

Summary of tests run by the Diagnostic Utility v.2.1 at 2/22/04 12:27:33 PM
SecNet Version: 4.2.0.65496
Partner ID: 7
Request ID: 2
Windows version: Microsoft Windows 98se version 4.10 A (Build 2222)

Brief summary of tests:

General Network Tests -> PASSED

*Subtest: Initiate Sockets -> PASSED

*Description: Verifies that sockets can be initiated on your computer.

*Subtest: Create Socket -> PASSED

*Description: Verifies that a socket can be created on your computer.

*Subtest: DNS Availability -> PASSED

*Description: Verifies that the Domain Name Service (DNS) is available. The DNS translates an IP address into a computer name.

*Subtest: HTTP Connection -> PASSED

*Description: Verifies that your computer can connect to an HTTP (Web) server.

Configuration Tests -> PASSED

*Subtest: Version Information -> PASSED

*Description: Reads the version information for certain key files and libraries.

*Subtest: Check MFC -> PASSED

*Description: Verifies that the proper version of MFC is installed.

*Subtest: Check TCP/IP -> PASSED

*Description: Verifies the TCP/IP configuration information on your computer.

*Subtest: General Settings -> PASSED

*Description: Verifies miscellaneous system configurations on your computer. This information may help Support solve some problems.

*Subtest: Check BHO -> PASSED

*Description: Verifies that the Browser Helper Object (BHO) is correctly installed.

*Subtest: Driver Versions -> PASSED

*Description: Verify the versions and dates of the Packet Driver and Socket Driver.

General Network Tests -> PASSED

*Description: These tests make sure that your computer is properly connected to the Internet.

*Subtest: Initiate Sockets -> PASSED

*Description: Verifies that sockets can be initiated on your computer.

*Details:

Initiating sockets...

Initializing sockets succeeded.

*Subtest: Create Socket -> PASSED

*Description: Verifies that a socket can be created on your computer.

*Details:

Trying to create socket...

Socket created.

*Subtest: DNS Availability -> PASSED

*Description: Verifies that the Domain Name Service (DNS) is available. The DNS translates an IP address into a computer name.

*Details:

Doing lookup on www.google.com...

Lookup succeeded.

*Subtest: HTTP Connection -> PASSED

*Description: Verifies that your computer can connect to an HTTP (Web) server.

*Details:

Doing lookup on www.google.com...

Lookup succeeded.

Trying to create socket...

Socket created.

Connecting to www.google.akadns.net...

Connection succeeded.

Configuration Tests -> PASSED

*Description: These tests make sure that your computer is properly configured to run SecNet.

*Subtest: Version Information -> PASSED

*Description: Reads the version information for certain key files and libraries.

*Subtest: Check MFC -> PASSED

*Description: Verifies that the proper version of MFC is installed.

```
*Details:
Checking that mfc42.dll exists in the system folder...
File found at C:\WINDOWS\SYSTEM\mfc42.dll.
Loading shared library mfc42.dll...
Successfully loaded.
Getting version information.
Correct version of MFC42.DLL installed:
Product Version: 6.0.4.0.
Product Version as string: 6.0.400.
```

```
*Subtest: Check TCP/IP -> PASSED
*Description: Verifies the TCP/IP configuration information on your computer.
*Details:
